NIPPON COLUMBIA CO., LTD.

PRECAUTIONS FOR INSTALLATION

DRA-25/25L uses a newly developed heat emitting unit by employing heat pipes. Since the heat pipes contain a coolant, the DRA-25/25L must be set level or the desired heat emitting effect cannot be achieved. Always install this unit horizontally.

ADVICE FOR USE

- Do not place the set in direct sunlight, in hot areas such as near heating equipment, with high humidity or dust levels. This may cause damage to the unit.
- Check that all parts are connected correctly before turning on the power source.
- When user is absent for long periods, be sure to remove plug from wall socket.
- Do not use insecticide, benzene or thinner near the unit, or the cabinet color will fade. Avoid using polish: use a soft cloth (e.g. silicon cloth).
- It is not recommended to place players, decks and other objects on the DRA-25 or DRA-25L so that the vents are blocked. This will cause internal temperature rise and equipment failure. Do not use the DRA-25 or DRA-25L in a closed cabinet or container. This will cause internal temperature rise abnormally.

For United Kingdom model only.

WARNING:

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black. The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured RED.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral
Brown: Live

SPECIFICATIONS

AMPLIFIER SECTION

Rated Output Power:

30W + 30W per channel minimum RMS, both channels driven at 8 ohms from 20 Hz ~ 20 kHz no more than 0.05% total harmonic distortion 45W + 45W per channel minimum RMS, both channels driven at 4 ohms from 1 kHz DIN no more than 1% total harmonic distortion

Power Bandwidth (IHF):

10 Hz ~ 40 kHz (T.H.D. 0.1% both ch. driven at 8 ohms)

Total Harmonic Distortion (20 Hz to 20 kHz):

~3 dB power into 8 ohms 0.04%

Frequency Response:

PHONO RIAA Standard Curve (Recording Output)
MM 20 Hz ~ 20 kHz ± 0.5 dB
20 Hz ~ 50 kHz ± 1.5 dB

Input Sensitivity and Impedance:

PHONO
MM 2.5 mV 47 k ohms
AUX, TAPE, CD
150 mV 33 k ohms

Maximum Input Level (at 1 kHz):

PHONO
MM 150 mV

Signal to Noise Ratio (IHF-A):

PHONO
MM 78 dB at 5.0 mV input
AUX, TAPE, CD
95 dB at 150 mV input

Tone Controls:

BASS ± 10 dB at 100 Hz
TREBLE ± 10 dB at 10 kHz

Loudness, Control Effect:

VARIABLE LOUDNESS 10 positions, 50 Hz/10 kHz, $+10$ dB/ $+5$ dB

S/N 50 dB Quieting Sensitivity:

MONO 1.6 μ V (15.3 dBf)
STEREO 23 μ V (38.5 dBf)

Signal to Noise Ratio (IHF-A):

MONO 82 dB
STEREO 78 dB

Total Harmonic Distortion (at 1 kHz):

MONO 0.2%
STEREO 0.4%

Capture Ratio:

1.5 dB

Image Rejection:

70 dB

AM Suppression:

50 dB

Selectivity (± 300 kHz):

60 dB

Frequency Response:

30 Hz ~ 15 kHz $+0.2$ dB

Stereo Separation (at 1 kHz):

40 dB

[MW]

Receiving Range:

522 ~ 1611 kHz

Usable Sensitivity:

18 μ V

Signal to Noise Ratio:

53 dB

[LW] (DRA-25L only)

Receiving Range:

153 ~ 360 kHz

Usable Sensitivity:

30 μ V

GENERAL

Power Supply:

AC 220 V 50 Hz (for Europe)
AC 240 V 50 Hz (for U.K. & Australia)

Power Consumption:

120 W

Dimensions:

434 mm (17-3/32") W x 112 mm (4-13/32") H x 278 mm (10-15/16") D

Weight:

5.5 kg (12 lbs 2 oz)

TUNER SECTION

[FM] (note: μ V at 75 ohms, 0 dBf = 1×10^{-15} W)

Receiving Range:

87.5 ~ 108 MHz

Usable Sensitivity:

0.9 μ V (10.3 dBf)

Design and specifications are subject to change without prior notice.

NOTE: The following codes correspond to the appropriate models.
E2 for Europe, EA for Australia and EK for U.K.
This Service Manual is prepared based on E2 Black Version.

| ⑤ PHONO (Phono Input Terminals) | |

CONNECTION (This is a figure of the DRA-25L)

SPEAKER CONNECTION

Confirm polarity (+, -) and left and right channels (L, R). Connect the speaker pairs to the SPEAKER terminals A or B on the back panel. Connections must be made with power cord disconnected.

1. Peel off the sheathing from the end of the cord.
2. Twist the wire strands.
3. Loosen the speaker terminal, insert the wire lead portion of the cord, and then tighten the terminal.

ANTENNA INSTALLATION

FM ANTENNA

The accessory T-type indoor antenna (300 ohms) can be used inside wooden houses for local FM stations and strong signals. Orient the T-shaped part for optimum reception and mount the antenna on the wall or ceiling. (FM indoor antennas may not consistently ensure stable reception, due to environment changes. In such cases use an FM indoor antenna temporarily until an outdoor antenna is installed.)

75 ohms coaxial cable (3C-2V, 5C-2V) is preferable to obtain better performance of the tuner. (To use of a 300 ohms FM outdoor antenna, connect to the 300 ohms terminals.)

AM ANTENNA

Attach the accessory AM loop antenna to the antenna holder on the back panel.

Connect the leads to AM and GND terminal. Use this terminal also for an outdoor antenna.

Orient the loop antenna horizontally to obtain optimum reception. Where broadcast stations are distant and only weak signals are received, or where signals are blocked by obstacles, install an AM outdoor antenna.

GROUNDING

If there is reception noise, use of grounding wire is recommended.

Connect a thick insulated wire to the "GND" terminal, and attach the unconnected bare end to a metal water pipe, grounding rod, or grounded copper plate.

- Never connect the grounding wire to a gas pipe. This could cause fire or explosion.

Note:

- Two FM antennas should not be connected simultaneously.
- Even if an external AM antenna is used, the AM loop antenna should not be disconnected.
- AM loop antenna lead terminals do not touch the metal part of the back panel.

REMOVAL OF EACH SECTION

1. Top Cover

- 1) Unfasten the 7 screws.
- 2) Detach the top cover by means of lifting it upward.

Fig. 4

2. Front Panel

- 1) Pull out the knobs. (Main volume control knob x 1; input selector knob x 1; tone, balance, etc. x 4.)
- 2) Remove the 4 screws from the bottom.
- 3) Push downward the 4 claws on the top of inner panel to release catching of front panel, then pull the front panel forward and detach.

Fig. 5

3. PCB

- 1) Remove the power knob.
- 2) Unfasten the 4 screws. (Inner panel x 2; power switch x 2.)
- 3) Remove the 5 screws on the back panel.
- 4) Remove the 2 screws securing the heat pipe fin.
- 5) Detach the AC cord bushing.
- 6) Remove the 3 heads of PCB holder and pull the holder upward to detach.

Fig. 6

4. Inner Panel

- 1) Take out the speed nut of headphone jack.
- 2) Pull out the speaker selector switch knob and remove the 1 screw fixing the switch. (For EK and LE2 versions, disregard this step.)
- 3) Unfasten the 1 screw holding the tone volume controls.
- 4) Remove the screw tightening the input selector.
- 5) Remove the nut and washer securing the main volume control.
- 6) Pull forward the inner panel to detach.

Fig. 7

5. FLD, Tact Switch PCBs

Remove the push-rivet holding the respective PCB to remove each PCB.

Fig. 8

METHOD OF ADJUSTMENTS

IDLE CURRENT ADJUSTMENT (Fig. 4)

1. Keep the unit away from direct wind blown by an air-conditioner and an electric fan, and keep the unit under normal conditions. Adjust the range of ambient temperature to 15 – 30°C.
2. Set the following switches as follows:
 - POWER (power switch) to off
 - VOLUME (VOLUME CONTROL) to 0 ()
 - SPEAKERS (speaker terminal) to no load (speakers disconnected)
3. Remove the top cover and connect a DC digital voltmeter to the test points (between the positive terminal TP3 ⊕ and the negative terminal TP1 ⊖, and between the positive TP4 ⊕ and the negative terminal TP2 ⊖).
4. (1) Connect the power source cord to an AC outlet and turn on the power switch; read the measured value after 3 minutes or when the measured value is within a tolerance 6 mV ~ 90 mV (DC), adjust the idling current manually as follows.
 (2) When the voltmeter reads 3 mV (DC) or less under the condition of item (1), disconnect the 39 ohm from resistance R517 and R518.

- AC OUTLETS . . . For U.S.A., Canada and Asia models.
AC outlets are used for connecting amplifier component units, such as tuner, turntable, tape deck, etc.
- SWITCHED (Capacity: 100 W):
This outlet is turned on/off when main power switch is turned on/off.
- UNSWITCHED (Total capacity: 250 W):
These outlets are always ON whether power switch is on or off.
- LINE VOLTAGE (Voltage select switch) . . . For Asia model only.
 - * The desired voltage may be set with the VOLTAGE SELECTOR KNOB on the back panel using a screw driver.
 - * Do not twist the VOLTAGE SELECTOR KNOB with excessive force. It may be damaged.
 - * If the voltage select switch does not turn smoothly, see a qualified serviceman.

EXPLODED VIEW OF CHASSIS AND CABINET (DRA-25/25L)

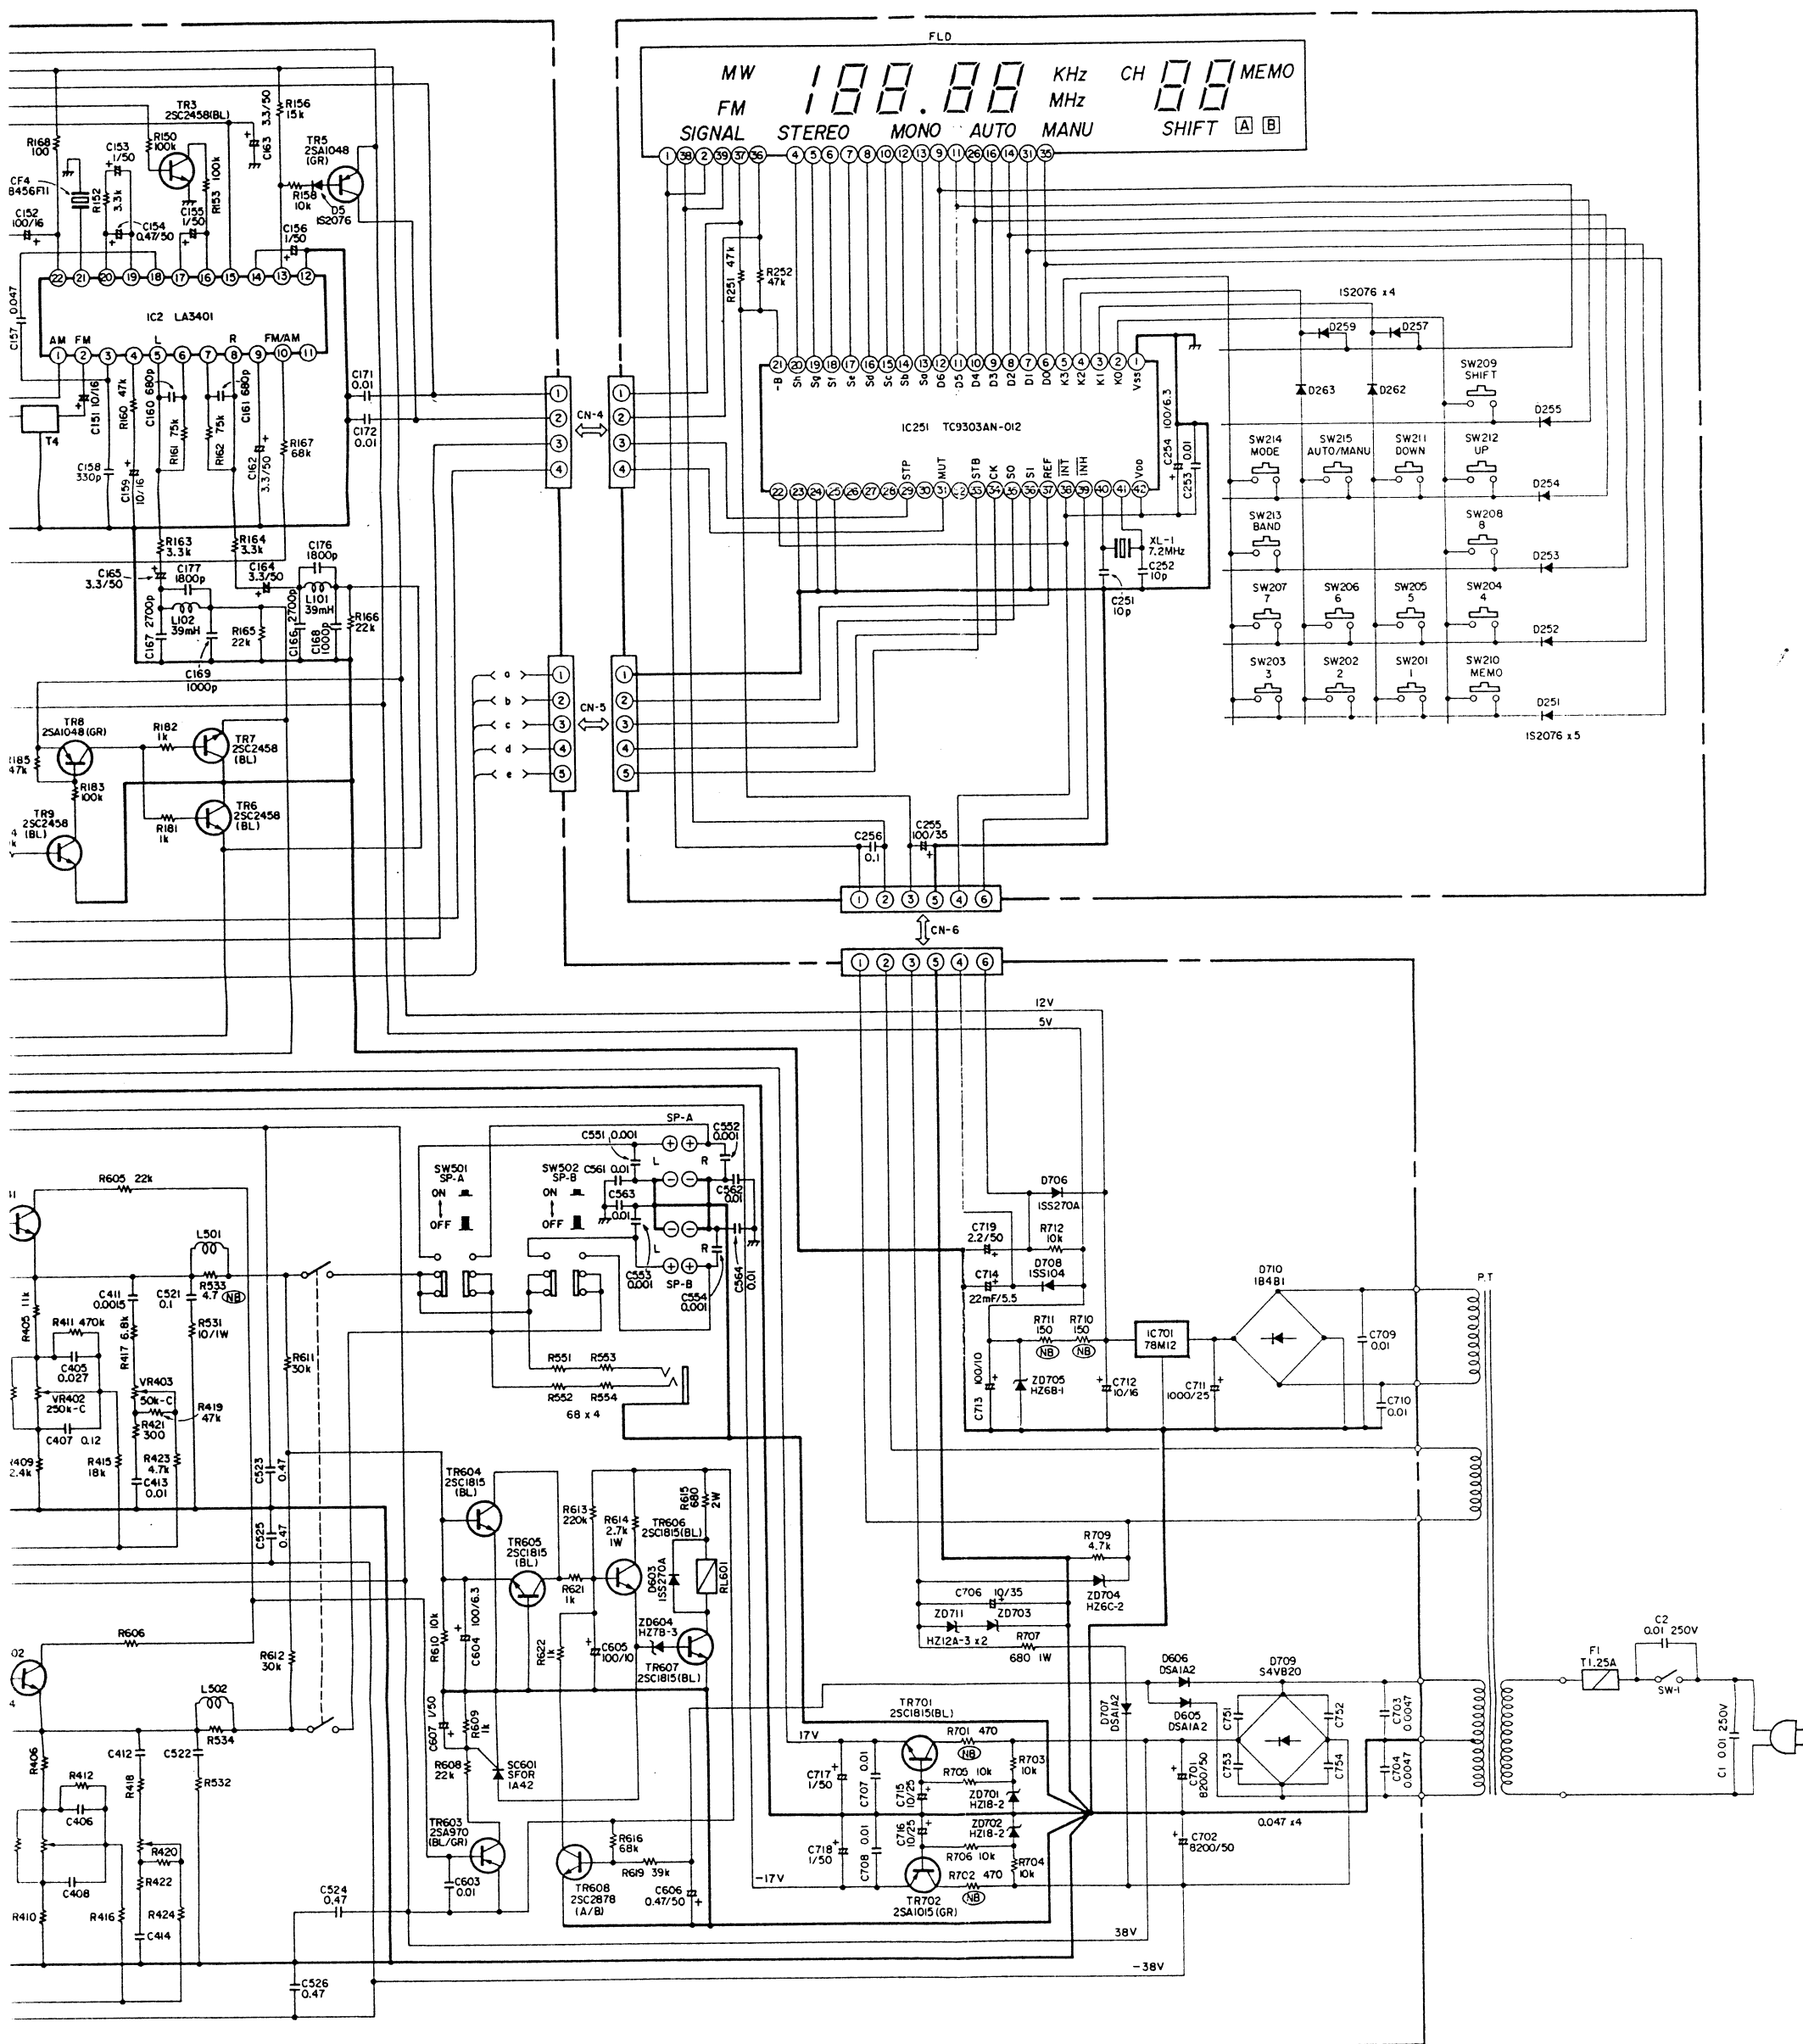

WIRING DIAGRAM

SCHEMATIC DIAGRAM (for DRA-25)

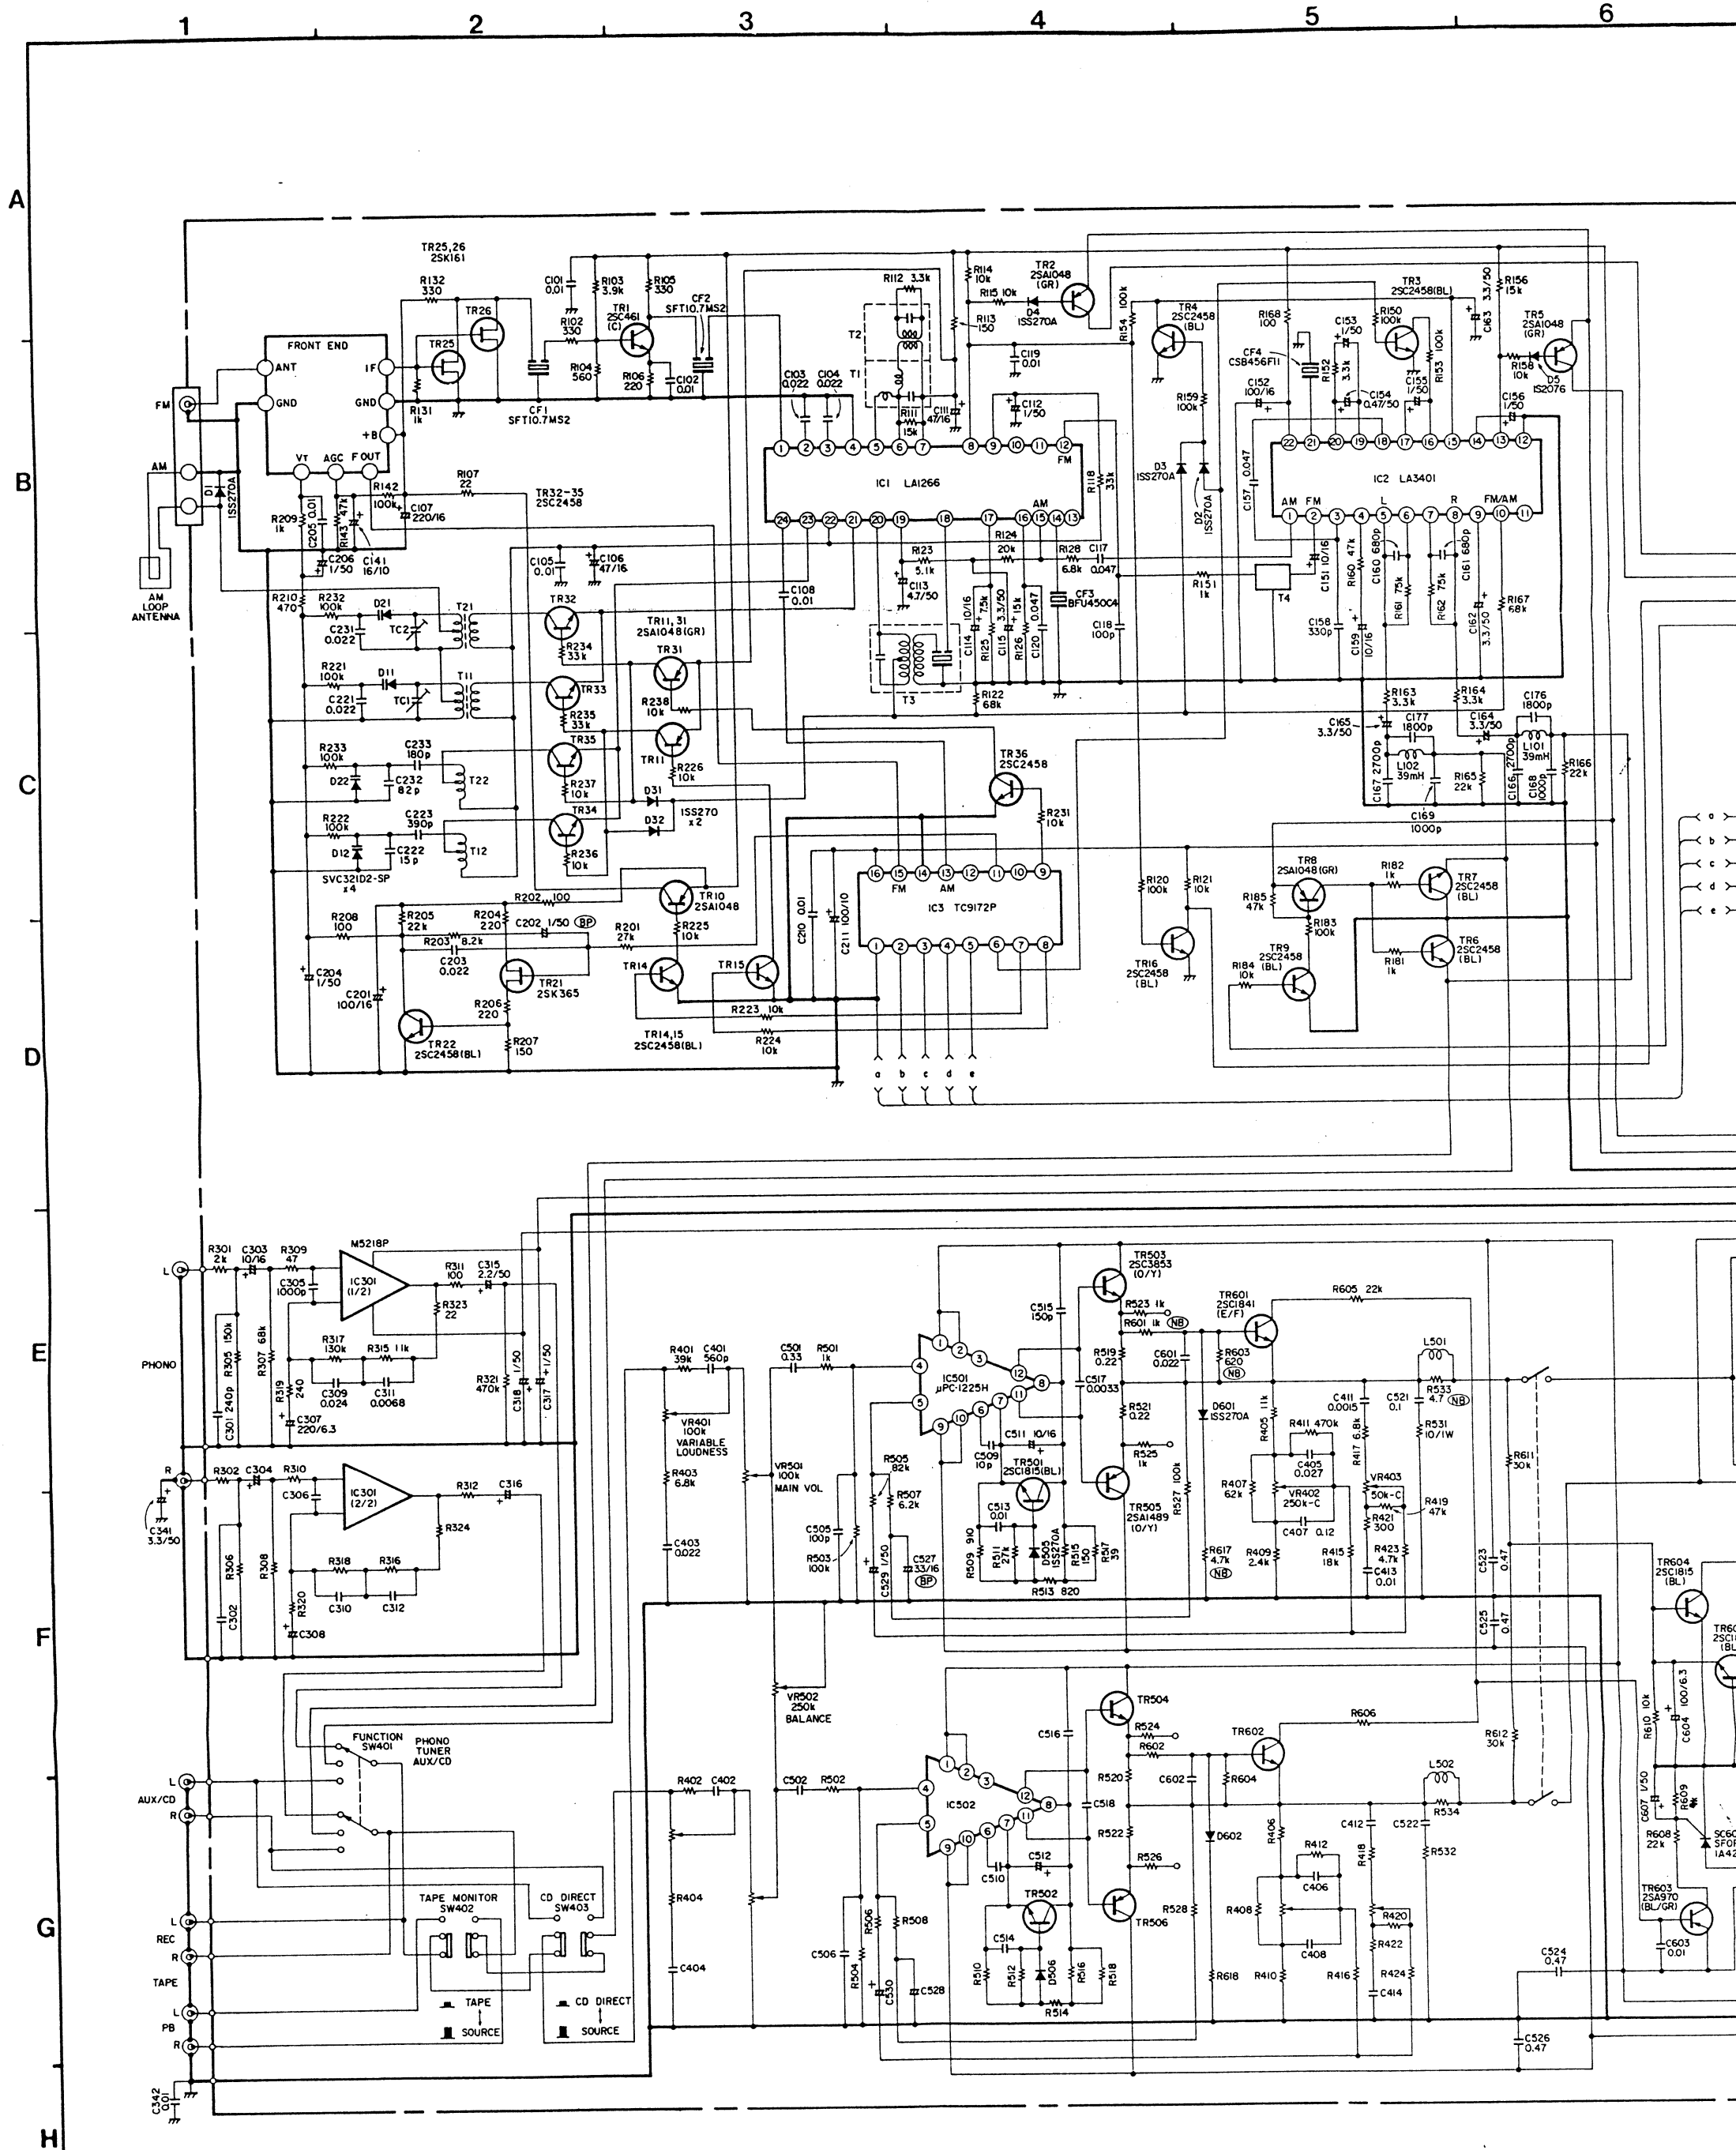

⚠ Means important safety item, which must be replaced, when necessary, by a part specified or meeting the specification by the manufacturer.

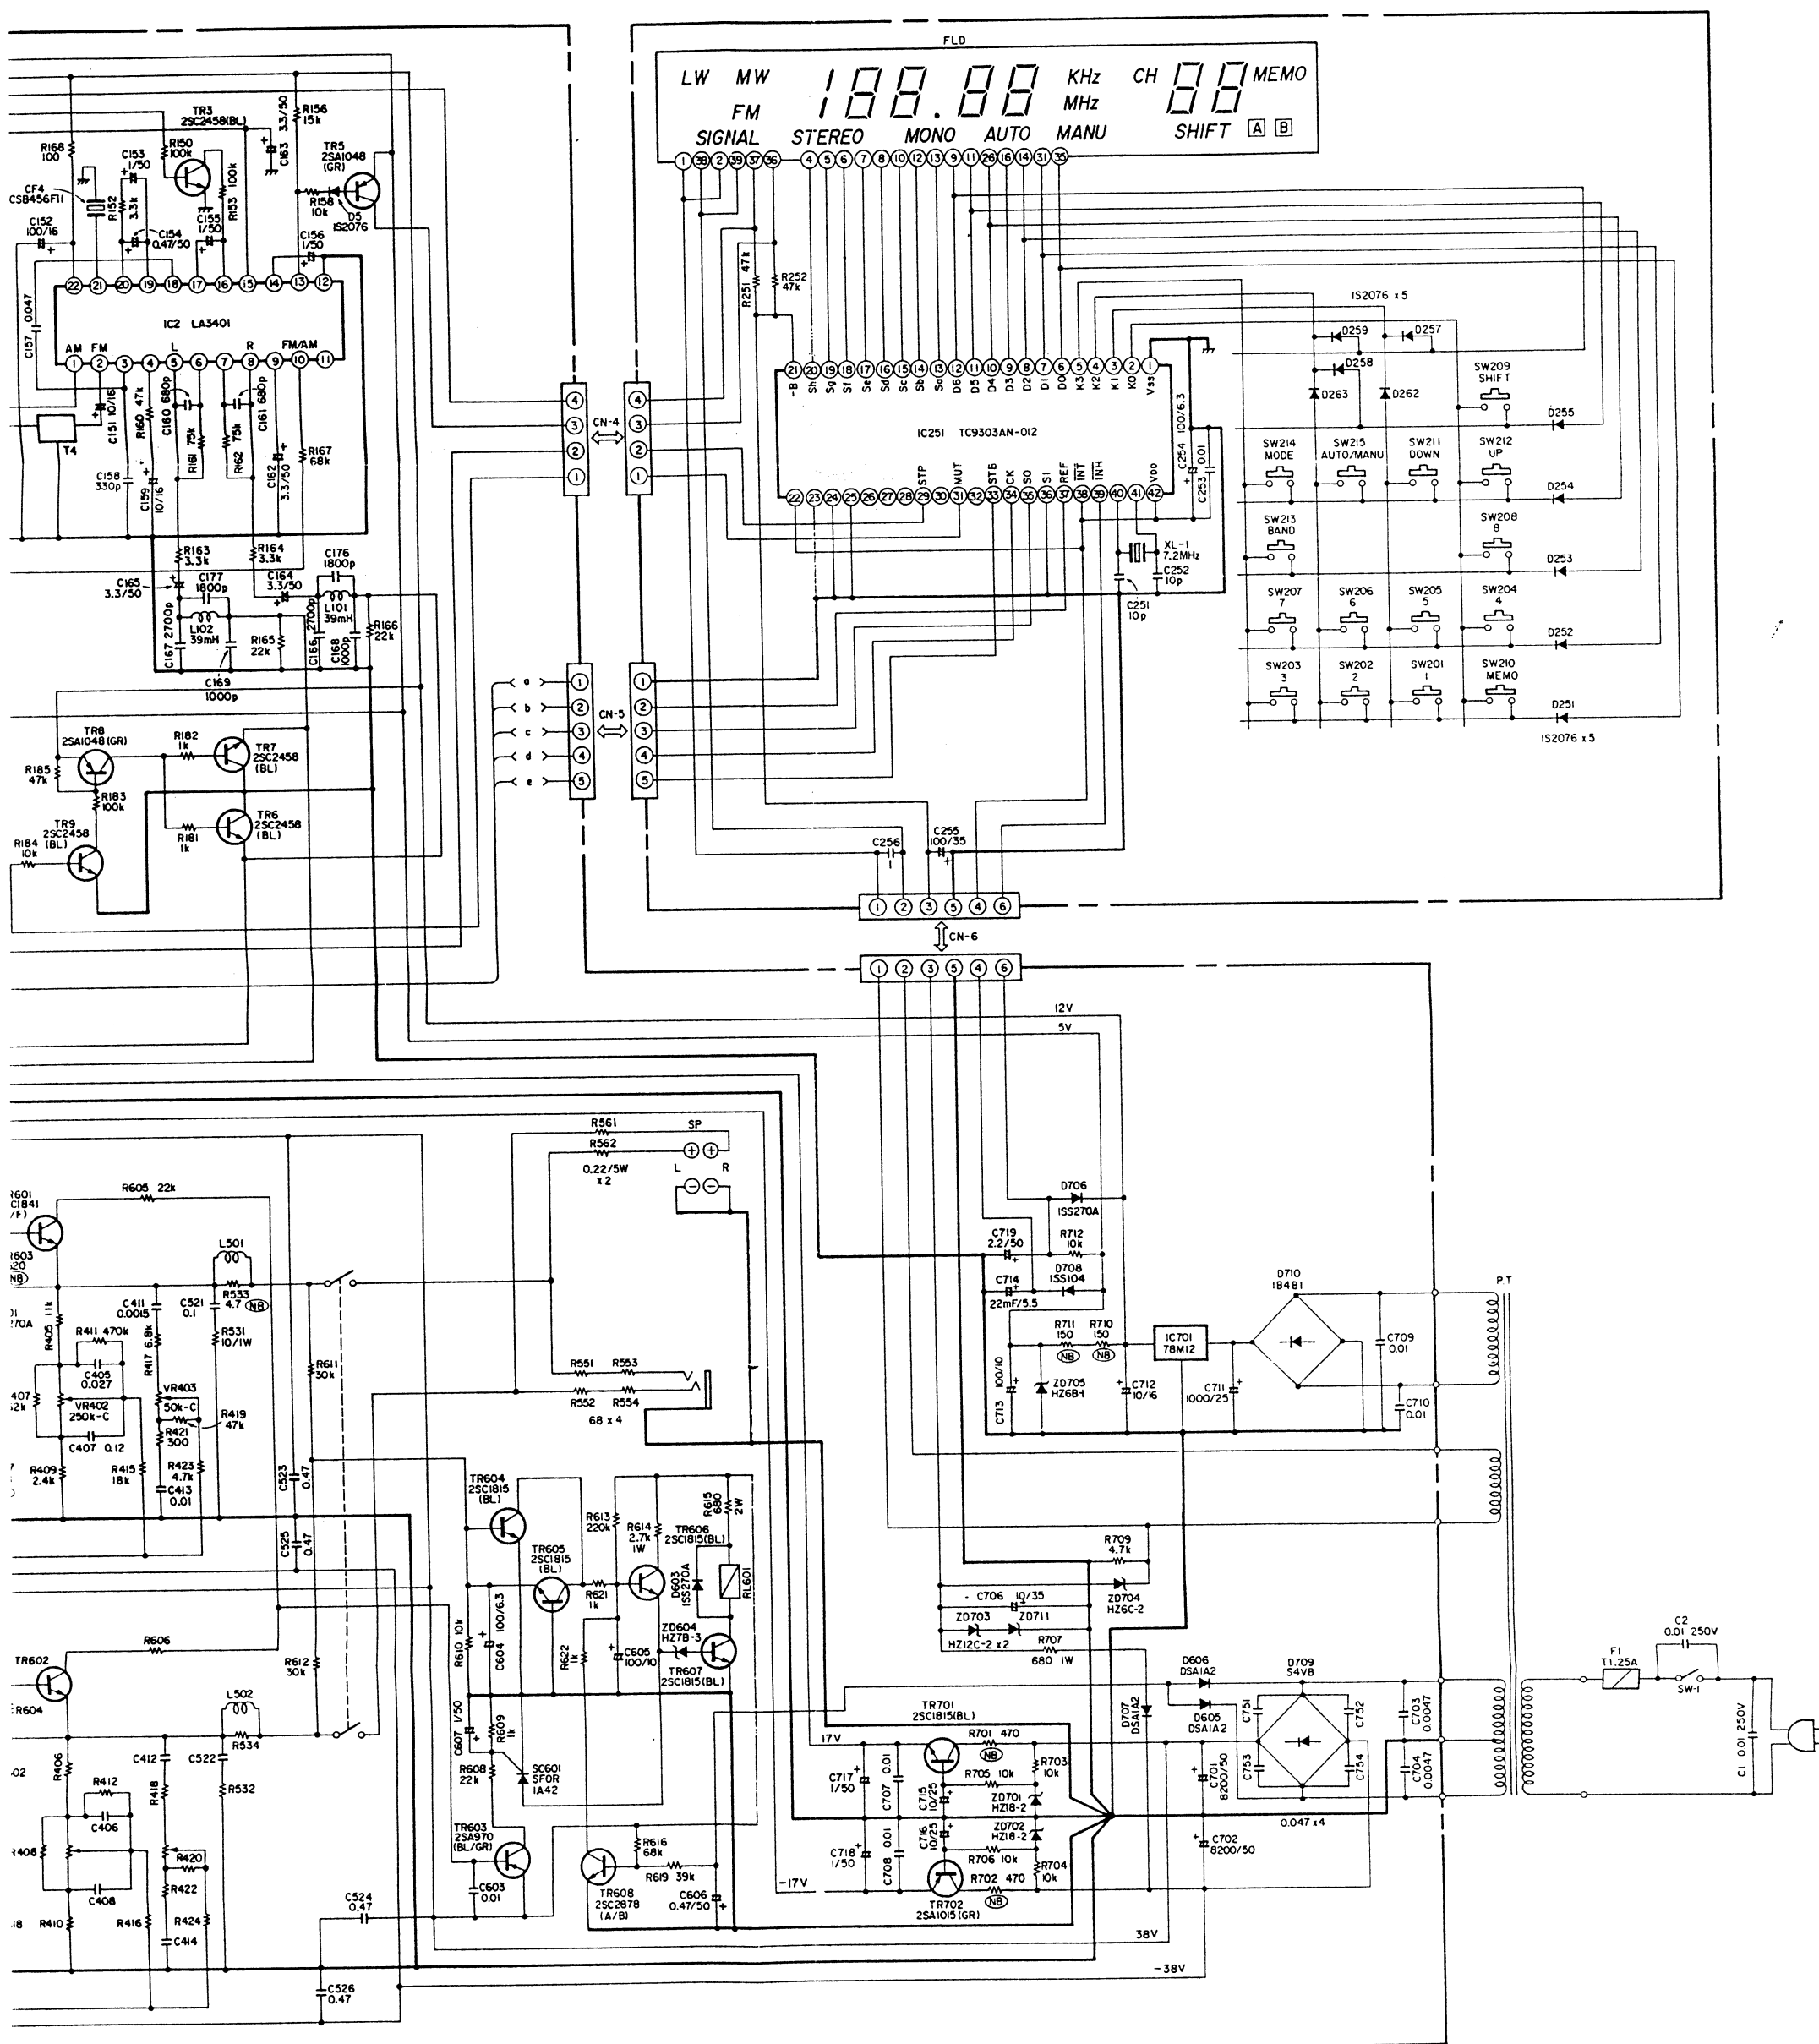

NOTES:
ALL RESISTANCE VALUES IN OHM, k = 1,000 OHM, M = 1,000,000 OHM.
ALL CAPACITANCE VALUES IN MICROFARAD, P = MICRO-MICRO FARAD.
EVERY VOLTAGES AND CURRENTS IS MEASURED AT NO SIGNAL INPUT CONDITION.
CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE.

SCHEMATIC DIAGRAM (for DRA-25L)

 Means important safety item, which must be replaced, when necessary, by a part specified or meeting the specification by the manufacturer.

NOTES
ALL RESISTANCE VALUES IN OHM K = 1,000 OHM M = 1,000,000 OHM
ALL CAPACITANCE VALUES IN MICRO FARAD P = MICRO-MICRO FARAD
EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT CONDITION
CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE.
